

Title

- A brief, informative title (ideally under 12 words) that clearly indicates the topic.

Authors and Affiliations:

- List all authors and their respective affiliations.

Introduction:

- Briefly introduce the research topic and its relevance
- State the research question or objective.

Methods:

- Describe the study design (e.g., case study, experimental, etc.).
- Specify the sample (e.g., number of participants, demographics, inclusion/exclusion criteria).
- Outline the assessment tools or procedures used.

Results:

- Summarize the key findings of the study.
- Present statistically significant results or clinically relevant observations.

Discussion/Conclusion:

- Interpret the findings in the context of existing literature.
- Highlight the clinical implications of the research.
- Mention limitations of the study if applicable.

Keywords:

- Include 3-5 keywords

Note: Keep the formatting as given in the template

Abstract should be max of 300 words.
